

**REMARKS**

The amendment is submitted under Rule 312 to reinsert reference to "a double bond" which should not have been cancelled since the definition of R<sub>1</sub> as forming with R<sub>1</sub>  
the endocyclic carbon atom carrying - N \ a double bond as defined in the first  
3 lines of page 2 of the application is incomplete. The amendment raises no new issues  
and is properly entered under Rule 312.

Respectfully submitted,  
Hedman and Costigan
